

COSC 1P02 Fall 2016

Lab Exam Procedures

Date

Thursday, Dec. 8, 2016

Time

8:30 am, 11:00 am, 1:30 pm and 4:00 pm. You must attend the session for your lab section as indicated on the attached Schedule.

Duration

2 hours

Location

D205 (note this is **not** the 1P02 lab room) **and** J301 (the lab room). You must do the exam in the room for your lab section as indicated on the attached Schedule.

Instructions

You will be randomly assigned **two** of the questions, one from Part A and one from Part B. To prepare, you should become familiar with all problems by coding and testing a solution.

During the lab exam, you will not be allowed any electronic media (cell phones, USB drives etc), personal notes, or network access. You will log on to a special exam userid and you will not have access to your Z : drive. You may bring a pen or pencil and paper will be supplied if needed. Do not bring anything else to the lab room for the exam.

In the question script you will be given specifications, including methods that must be written with their required parameters. These should be followed and implemented for full marks. Solutions that produce the required result but do not follow the specifications will be penalized. Programs should use other methods and Java constructs appropriately as needed. Part marks are awarded for correct partial implementation. You do not need to comment your code. Execution efficiency is not a concern.

You will be using the DrJava development environment. To aid you we will provide both the template for Java classes and the method summary for the classes we have discussed as included in this package.
